The ideal workshop for GIS Managers, IT Directors and Public Safety Officials

This session was designed to give the Public Safety Administrator and GIS Coordinator 10 ways to maximize the investment in 911 and GIS to produce highly efficient and effective mapping tools that depend on accurate GIS data. Attendees will be given the overall scope of how GIS data is used and developed for use in a 911 public safety mapping application such as crime/incident mapping, dispatch, fires and ems incident mapping, address management, mobile and avl, and public access tool.

Grant Funds Have Allowed Us to Waive the \$299/ Person Registration Fee!

Door Prizes will be Handed Out

Space is limited!
