

Spring 2011 GPS Workshops in Maine

Google Puts the "G" in GPS

May 10th
Wells, ME

9am to noon

Topics covered:
GPS data collection
GPS with Google mapping
GPS navigation

\$20

Skill level: The Basics

Learn to bring GPS data into Google Earth, and just as easily, put features from Google Earth into your GPS! Learn to collect GPS data in the field, then use it to create your own custom map using Google Earth. Also, discover how to take any location from Google Earth and send it to your GPS receiver navigate to that point in the field.

Participants will learn to:

collect and upload GPS data in Google Earth, mark download points from Google Earth for use in GPS field navigation

Participants will be provided with:

exercise manuals, workshop data, GPS units
laptop computer with relevant software installed

Trail Mapping with GPS

May 10th
Wells, ME

1pm to 4pm

Topics covered:
using GPS to map trails
using GPS to map natural features
making simple trail maps

\$20

Skill level: Fundamentals

Learn to how to map trails using handheld GPS units! The workshop begins with a discussion of best practices for mapping trails with GPS. Next, the course moves out to provide participants with a hands-on opportunity to practice mapping trails. Finally, we finish up mapping newly collected trails and features using Google Earth or free GIS software.

Participants will learn to:

use GPS to map trails and other natural features, create basic trail maps using GPS data in Google Earth or free GIS software

Participants will be provided with:

exercise manuals, workshop data, GPS units
laptop computer with relevant software installed
