

# LUNCH & LEARN

Special for:  
Thursday, November 3rd,  
12:00-12:50 pm,  
Rm. 4

## Heat pumps:

**Save Money, Save Energy, Save the Environment**

*Presented by Adam Barker-Hoyt*

**Mainers are the #1 users of heating oil per capita** in the United States: over 70% of Mainers use oil to heat their homes. With an impending energy crisis and an economy held hostage to foreign oil, Mainers deserve options.

This talk will outline the major benefits of owning and utilizing mini-split heat pumps in Maine and how they can reduce your demand for heating oil.

In addition to detailing their basic components and operation, mathematical analysis of the economics, energy production, and environmental effects of mini-split heat pumps will be described and summarized.
