

What does it mean to be a school district that focuses on student growth and achievement?

Discussion Review Sheet

Some experts collectively forecast, that by 2027 students will:

- *Be digital natives who utilize technology to personalize their learning environments with teachers – far more adaptive learning platforms utilized.
- *Study a more global curricula, which has been nationally normed and integrated with more global world systems.
- *Have more integrated and connected learning environments that utilize online learning spaces such as social media, online communities, chats, online classrooms and programs.
- *Have less of a focus on handwriting, and a greater ability to problem solve.
- *Do away with the “summer slide-back,” which moves to year round schooling.
- *Use videos instead of textbooks.
- *Go to college for free (no more borrowing money to go to college).

**This is not an articulation of a viewpoint, or any particular agenda for or against any one of these topics/websites...just a few items I pulled off...*
