The Basics

What is the Administrative Window?

The discount percentage and organizational structure of schools and school districts affect both libraries and consortia (e.g. Networkmaine). In order to level the playing field so that applicants of all entity types can file a Form 471 without being delayed by missing or inaccurate data for other applicants, USAC implements an Administrative Window.

The purpose of the Administrative Window is to establish a designated timeframe for applicants to update EPC profiles, which will then be locked down for use by all applicants.

During the Administrative Window, independent schools and school districts must update their EPC profiles, including the data used to calculate E-Rate discounts and organization relationships such as the list of schools belonging to a district.

It is extremely important that you make your profile updates during the Administrative Window as it is generally impossible to do so once the window closes.

**FY2019 Administrative Window:
October 1, 2018 - January 15, 2019**

What information should I update?

At a minimum, you should annually update the data that is used to calculate your organization's E-Rate discount percentage:

- Number of Full Time Students
- Total Number of Students Eligible for NSLP

Independent Schools should update this information for their organization.

School Districts should update this information for each school in their organization.

What if my district's organizational structure has changed?

Contact the state E-Rate coordinator for assistance in the following situations:

- A school district has split:
schools that have left one school district will need to be detached and moved to their new district
- School districts have merged:
schools will need to be attached to their new parent school district
- A new school has opened:
a new billed entity number will need to be created for any new schools
